Windows

Windows does not have Perl installed by default.

Binaries

ActiveState Perl ActiveState offers both a free community version and a commercially supported binary distribution of Perl for Win32 and Perl for Win64.

DOWNLOAD ACTIVEPERL

Strawberry Perl: A 100% Open Source Perl for Windows that is exactly the same as Perl everywhere else; this includes using modules from CPAN, without the need for binary packages. Help is available from other Windows Perl developers on the #win32 irc channel on irc.perl.org (see website for access through a browser).

DOWNLOAD STRAWBERRY PERL

Source

Consider looking at App::perlbrew to help compile and manage Perl from source.

Find out more about the source code, development versions as well as current releases of the Perl source code.
